

Photovoltaics are present in the 3rd European Energy Forum

Sol3g is already preparing the great energy meeting that will celebrate in Barcelona between 16th and 18th April. Defined like International Trade Fair and Congress about Innovative Energetic Technologies of the XXI century, supposes a great communication and exchange of ideas opportunity between the reference actors of our market.

Montané Comunicació, the event promoters, wants to exceed the past edition. 2.000 visitors and 400 speakers could enjoy with the great energy meeting on 2007.

The company is going to be present as an exhibitor, located in the stand number 113B. Besides, Ricard Pardell, Sol3g Manager and Technical Director, is going to take part in the Congress with a speech on concentration photovoltaics.

With this action, Sol3g's objective is to promote both its products and HCPV public technology knowledge. Our technology is based on an optical system that concentrates the solar light in a much smaller area of solar cell. Few semiconductor material is used than a traditional crystalline silicon flat panel, with the consequent cost savings.

As well, after four years of life and an intensive R+D activity, Sol3g is positioned as a solid trade with the intention of communicate to the event's public its corporate identity. Sol3g is a leader company in HCPV, whose philosophy is to contribute, by producing more affordable photovoltaic systems, to an important saving of fossil energy and a significant reduction of CO2 emissions.
